**A**ppplied Sociology is the application of sociological ideas, concepts, theories and models to address everyday problem or situations. These arise in the workplace, at homes, in communities or in organizations. Sociology enables nurses to understand their social responsibility as agents of change. When you have the capacity to heal or make your patients feel better, you are not only treating their illness, but you are also improving the quality of their lives.

Basically, this text book is written as per the revised new syllabus of INC, New Delhi for first semester of 1<sup>st</sup> year B.Sc. Nursing. This book comprises seven units and covered all chapters.

#### Salient Features:

- Described the procedures in applying knowledge of social structure and different culture in a society in identifying social needs of sick clients.
- Impact of culture on health and illness is explained for ease understanding.
- Characters of family, importance of marriage, legislation on Indian marriages are brought out.
- To develop in understanding about organization and disorganization of problems in India are narrated.
- Knowledge of clinical sociology and its uses in crisis intervension are explained in needful.
- Simplified presentation of flowcharts, tables and several images for better perception, comprehension and presentation in the examination.
- Key Terms and Overview are given at first and end of each chapter to have an idea to alert the students in the topic.
- Review Questions, long and short answer, Fill in the blanks, MCQs, Match the following etc., are provided at the end of each chapter for the purpose of self evaluation.

To conclude, this textbook is the best companion to every nursing student to develop understanding about basic concept of sociology and to apply in personal and community life, health, illness and nursing.
