Appplied Anatomy is primarily intended for students of B.Sc. Nursing to seek basic understanding of human body from cellular level to system level. This text book is written according to revised new syllabus of INC, New Delhi for first semester of 1st Year B.Sc. Nursing. The main object of this subject is to acquire the knowledge of the normal structure of human body, identify alteration in anatomical structure with emphasis on application to practice nursing.

Simplification and organization of content under several sub headings are given to motivate the students to read the subject in sequence. Elaborated respiratory system, structure of organs and its functions for ease understanding. Described the structure of digestive system, the circulatory and Lymphatic system, Endocrine system with reference to diagrams wherever needed. Structure of bones, joints and its' anatomical position in skeletal system are briefly narrated. Muscular and Renal system, reproductive and nervous systems are described with needed information to meet the requirements of the students. Key Terms and Overview are given at first and end of each chapter to understand the chapter easily. Review questions, long and short answers, Fill in the blanks, MCQs, Match the following are given at the end of each chapter for self evaluation.

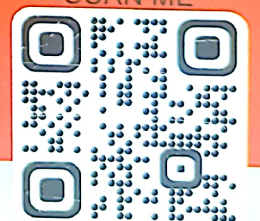

Sincere efforts have been taken to present the content in simplified form of flowcharts, tables and several images for better perception, comprehension, which able the students to present in the examination. Nurses implications have been included to focus on nurses' role in understanding the subject. To emphasize on clinical application of anatomical knowledge, this text is a must for all healthcare professionals.
