OBJECTIVES:

- To assess the knowledge of general population regarding prevention of corona virus.
- To give a basic knowledge about prevention of corona virus.
- To give health education about COVID 19.
- To identify the general population attitude towards prevention of covid 19.

This year we conduct PREVENTION OF CORONA VIRUS on 16 MARCH to raise the public awareness about the devastating health, social and economic consequences of corona virus.

The teachers who accompanied the program were Dr. S.G Joshi and Mrs. Jasneet Kaur.

Dr. Joshi gave a lecture on prevention of corona awareness on general public and after that was a short interactive session, general public were asked to raise questions in which they were having doubts. The virus spreads mostly through droplets that people send out when they talk, sneeze, or cough. These usually don't stay in the air for long or go farther than 6 feet. But the coronavirus might also travel through tiny aerosol particles that can linger for up to 3 hours and travel farther away. This is why wearing a facial covering can be important. It can keep you from giving it to others as well as helping you avoid breathing it in.

To prevent the spread of COVID-19:--Clean your hands often. Use soap and water, or an alcohol-based hand rub. Maintain a safe distance from anyone who is coughing or sneezing. Wear a mask when physical distancing is not possible. Don't touch your eyes, nose or mouth.

Cover your nose and mouth with your bent elbow or a tissue when you cough or sneeze. Stay home if you feel unwell. If you have a fever, cough and difficulty breathing, seek medical attention.

Although the vaccination started but with an average of 34,30,502 anti-coronavirus doses being given per day, India has topped globally in terms of the number of jabs administered daily, the Union health ministry said on first week of march.

THE FOLLOWING ACTIVITIES ARE CARRIED OUT:

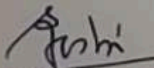

Due to safety of corona virus we organized short quizwas conducting regarding covid 19 awareness by asking questionnaire.

- Lecture was conducted in the interactive way and public were happy to by asking more questions.
- Presentation by Dr.S.G.Joshi on covid 19 prevention and awareness.
- Interactive sessions by public they asked doubts regarding presentation.
- A 15 min socio drama presented by SCON students. To give health education regarding how we prevent corona virus.
- All instructions given to participated community peoples.

CONCLUSION:

At the end of the program general public were able to grasp awareness about covid 19. The feedback from the general public is very good, due to covid prevention we avoid any personal
