Wed, Nov 27, 2024 at 10:20 AM

Dear All

Symbiosis College of Nursing plans to conduct an FDP with STLRC on 29th November 2024.

**Topic:** Systematic Review Essentials: Bridging Research and Practice

**Time:** 9:00 am to 1:00 pm

Following faculty members are requested to join the FDP online link will be shared by STLRC soon.

Sr. No	Name of the Faculty
1	Dr S G Joshi
2	Dr. Sheela Upendra
3	Dr. Jasneet Kaur
4	Dr. Seeta Devi
5	Dr. Shital Pimpalekar
6	Dr. Manisha Mistry
7	Dr. Ranjana Chavan
8	Dr. Mangesh Jabade
9	Dr. Dipali Dumbre
10	Mr. Husain Kamal Nadaf
11	Ms. Payal Bhagat
12	Ms Meghana Kambale
13	Mr. Milind Manohar Sanade
14	Mrs Surekha Sakore
15	Mrs. Betsy Sara Zacharias
16	Ms. Joyce Robert Mathivanan
17	Ms. Prachi Deepak Jadhav

This is for your kind information.

## FDP on Systematic Review

**Time:** 9:00 AM – 12:30 PM

**Date:** 22nd November 2024

**Batch:** 18 Participants from SCON

**Venue:** SCON

Dr. Judie Arulappan is an **Associate Professor** at the College of Nursing, Sultan Qaboos University, Oman, with extensive experience in **academic writing, qualitative and quantitative research, and systematic reviews**. Her expertise includes **mentorship in nursing research**, covering proposal writing, research execution, and publishing manuscripts.

A systematic review is a structured, transparent, and replicable method of synthesizing existing research to answer a specific question. Unlike traditional literature reviews, it follows a rigorous methodology to minimize bias and ensure reliability. Systematic reviews are widely used in healthcare, social sciences, and policy-making, providing evidence-based insights.

### Key Steps in a Systematic Review

1. **Define the Research Question** – Use structured frameworks like **PICO (Population, Intervention, Comparison, Outcome)** to ensure clarity.
2. **Develop a Search Strategy** – Conduct a comprehensive search across multiple databases (e.g., **PubMed, Cochrane, Scopus**).
3. **Study Selection & Screening** – Apply **inclusion/exclusion criteria** and document the process using a **PRISMA flowchart**.
4. **Critical Appraisal** – Assess study quality using tools like the **Cochrane Risk of Bias Tool**.
5. **Data Extraction & Synthesis** – Summarize findings qualitatively or use **meta-analysis** for statistical synthesis.
6. **Interpretation & Reporting** – Analyze results, acknowledge limitations, and suggest implications for research and practice.

## Importance of Systematic Reviews

- **Evidence-Based Decision-Making** – Guides clinical practice, policy-making, and research.
- **Minimizing Bias** – Follows a standardized approach to ensure objectivity.
- **Identifying Research Gaps** – Highlights areas needing further study.

## Conclusion

Systematic reviews play a crucial role in advancing scientific knowledge by synthesizing high-quality evidence. Following standardized protocols such as **PRISMA, Cochrane, and AMSTAR** ensures the reliability of findings. Despite challenges, systematic reviews remain the **gold standard** for evidence-based research, guiding policy and practice across various disciplines.
