1.	Current updates in Specialization topics can be added in the syllabus	Updated topics from respective course syllabus will be added and approved by BoS in the coming Academic year.
2.	Biophysics subject is not of much use for the students, it can be suggested to the statutory body to give less weightage to this subject	As this subject is laid down by Statutory body, so at college level no changes can be done. Statutory body is already working on Programme revision
3.	Over all curriculum for each programme is effective but they should have their more hands-on skills. There should be more exposed to practical part	Academic year 2019 -20 Academic and Clinical Planning is done keeping this point in consideration.

5.Would you recommend any new course / topic to be added in the program structure?

No, as the curriculum suffices the requirement in all aspects. and addition of new course or topic will warrant to increase in hours which will not be feasible with the current load of curriculum. However, we can have optional courses that a student can choose over an above with his current study and that are not compulsory. Example: Basics of Biomedical Engineering - just to understand how machines work and are handled.
