***Respected madam,  
PFA the testimony sent by Ms Roya Nemati.***

---

Dear Madam,

I am by names of Roya Nemati from Iran, a graduated student of B.Sc. Nursing from Scon, Batch 2015\_2019. My journey has began from the day that I felt I should dedicate my love and human kind to people in the world and I decided to pursue Nursing in India; but I knew I would have a difficult time because of my language problems and I was sure that I can make it with hard work. When I joined Scon, I felt that it was easy for me because I met very friendly teachers and staff who gave me hope. At first week of starting I lost my hope because I didn't have basic knowledge in English and I had to start learning English like a schooler to be successful, understanding the syllables and topics and specially my classmates' hand writing so I put extra effort and I focused to reach my goal so I reduced my sleeping hours and watching videos regarding topics which were taught by teachers and I repeatedly studied till I assured that I understood the topics and after that I discussed with my classmates to make sure that I understood completely and I thought the same topic to students who did not study, besides that I asked my teachers who are always open hearted and patient to help me and I tried my best and with so many difficulties I have never given up. In second year I gained some confidence and I started receiving the highest Marks in presentations and assignments and some practical exams and many compliments about my improvement and I passed 2nd year with distinction which I knew that I can make it and I started extending my relationships with other international students and participated in various workshops, conferences, events, functions and I improved my level of social relationships, communication and learned many things from them and I gained extra confidence to participate and absolutely received many awards in cultural, sports and many competitions like fashion show and hair styling and won the title of Miss Scon and... I participated in election and I won the title of SNA secretary post and I used to give speech and stand for other students' rights and make some changes which I could use my previous knowledge in law.

In third year I wanted to achieve bigger awards and I tried my best to have a publication research in the international medical journal and I received many awards in various fields and competitions in international levels which I gained experiences and I tried different things and I tried to be student leader and provide guidance for students like myself and I became a good example of excellent student and best leader in Iranian Student's Association and my college as well and my biggest achievements which are priceless and valuable are: awarded for best national student and Special student award from TNI (Trained Nurses Indian Association) which I felt all my hard work paid back.

In this journey I can't forget the big role of my Family, teachers, friends and classmates which are always in my heart and my prayers as well.

Regards  
Roya
